2621

DATE MAILED: 09/08/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/955,125	Applicant(s) NUMATA, KOHJI	
	Examiner Nigar Chowdhury	Art Unit 2621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 June 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-40 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-40 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 19 September 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Arguments

Applicant's arguments filed June 14, 2006 have been fully considered but they are not persuasive.

In re page 29, applicant argues that "Yokogawa fails to disclose, at least, "acquiring a scanning line value of display and adjusting a timing for a display changeover specification based on the scanning line value," as recited in claim 1."

In response, the examiner respectfully disagrees. Yokogawa discloses a scanning line value (Col. 4 line 15-19) of display (fig. 1(monitor)) and adjusting a timing for a display changeover specification based on the scanning line value (Col. 3 lines 17-22, system clock generating circuit 12 which generates timing signal to image data memory)

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2621

1. Claims 1, 6, 11, 16, 21, 26, 31, 36 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,463,210 by Yokogawa.
2. Regarding claim 1, a moving image reproduction system comprising a means for acquiring a scanning line value of a display and means for adjusting a timing for a display changeover specification based on the scanning line value (Col. 3 line 49- Col. 4 line 19).
3. Claims 11, 21, 31 are rejected for the same reason as discussed in corresponding system claim 1 above.
4. Regarding claim 6, a moving image reproduction system comprising a means for acquiring, when one frame is divided into two fields for displaying, a display scanning line value and adjusting a timing of a display changeover specification to display one of two fields based on display scanning line value (Col. 4 line 1-19).
5. Claims 16, 26, 36 are rejected for the same reason as discussed in corresponding system claim 6 above.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2-5, 7-10, 12-15, 17-20, 22-25, 27-30, 32-35, 37-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,463,210 by Yokogawa in view of US Patent No. 6,396,874 by Kato.

7. Regarding claim 2, Yokogawa discloses the means for acquiring the scanning line value comprises a timing adjuster (Col. 3 line 49-Col. 4 lines 19).

Yokogawa fails to teach

- A frame buffer including a plurality of buffers
- A storage for storing compressed image data encoded in an image compression encoding scheme
- A video decoder for reading out compressed image data from storage, decoding compressed image data every one frame, and storing decoded image data into frame buffer
- An image storage buffer switch for switching between plurality of buffers every time the compressed image data for one frame is decoded and controlling so as to always store a previously decoded image and a currently decoded image into frame buffer

- A display controller for switching between plurality of buffers, to be displayed during a next vertical blanking period, after reception of display changeover specification and displaying image data on said display

Kato discloses (Fig. 3. Col. 9 lines 23-Col. 10 lines19, Fig. 17. Col. 26 line 66-Col. 27 line 40)

- A frame buffer including a plurality of buffers (Fig. 17 (43-46))
- A storage for storing compressed image data encoded in an image compression encoding scheme (Col. 9 lines 30-39)
- A video decoder for reading out compressed image data from storage, decoding compressed image data every one frame, and storing decoded image data into frame buffer (Col. 27 lines 10-25)
- An image storage buffer switch for switching between plurality of buffers every time the compressed image data for one frame is decoded and controlling so as to always store a previously decoded image and a currently decoded image into frame buffer (Col. 27 lines 26-34)
- A display controller for switching between plurality of buffers, to be displayed during a next vertical blanking period, after reception of display changeover specification and displaying image data on said display (Col. 27 lines 26-34)

Therefore, it would have been obvious to one of the ordinary skill in the art at the time of applicant's invention to modify the proposed combination of Yokogawa's system to include plurality of buffers to store compressed image, switching system between

Art Unit: 2621

plurality of buffers and display controller for switching, as taught by Kato, for advantage of providing buffer to store compressed image, decoder to read out compressed image, switch for switching between plurality of buffers, and display controller for displaying changeover specification.

8. Regarding claim 3, Yokogawa discloses timing adjuster acquires a current scanning line from display (Col. 4 lines 15-19) but Yokogawa fails to disclose display controller.

Kato discloses display controller (Fig. 17 (51)). Therefore, it would have been obvious to one of the ordinary skill in the art at the time of applicant's invention to modify the proposed combination of Yokogawa's system to include display controller, as taught by Kato, for advantage of providing controller to control switch between plurality of buffers to display different buffer to the user.

9. Claims 4, 7, 9, 12, 14, 17, 19, 22, 24, 27, 29, 32, 34, 37, 39 are rejected for the same reason as discussed in corresponding system claim 2 above.

10. Claims 5, 8, 10, 13, 18, 20, 23, 25, 28, 30, 33, 35, 38, 40 are rejected for the same reason as discussed in corresponding system claim 3 above

11. Regarding claim 15, Kato discloses storing image data stores each frame in one of plurality of buffers (Col. 27 lines 9-25)

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

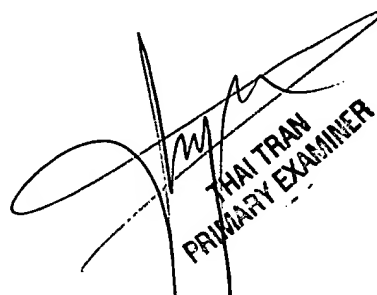

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nigar Chowdhury whose telephone number is 571-272-8890. The examiner can normally be reached on 9 AM - 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thai Tran can be reached on 571-272-7382. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
